I'm a new patient at Fortis Malar Hospital for the last 2 months. I think this is a great hospital that gives good care through knowledgeable, hard working and friendly staff. As an international patient sometimes it's difficult to ~~use~~ understand the process so I appreciate the department dedicated to international patients. Vidhya has been especially helpful and welcoming. Something that could be improved is a cue or some kind of number system in each department for patients waiting for treatment. Overall I think Fortis Malar is great hospital.

Respectfully,

Aaron Nelson
