

Dear Dr Sasikumar

First of all a BIG thank you for the timely and efficient way you handled my son, Pranav's, distress due to aspiration when we brought him in to Emergency of Fortis Malar on 6th Mar 2017. Hats off to you and your team in managing Pranav so well. Dr Sibi was tensed (given that my son is not very cooperative under such circumstances) but handled the situation very well also. A Big Thanks to him too.

Secondly, thanks for very patiently and clearly explaining the situation and answering the many questions my husband and I asked you without once getting irritated. I know it was a very busy day for you as the Emergency Room was full...but your patient listening helped in alleviating our distress.

Thirdly, thanks for going beyond the call of duty and looking in on Pranav and calling up every single day (even while on leave) to check on his well being. I am yet to meet a single doctor who reaches out so readily to his patients.

A BIG BIG Thanks to Dr G Prabhakaran, Dr Dinesh Nayak. I will be writing in separately to them. It was with all your help that Pranav was able to make a quick recovery.

Warm Regards

***Deepa Sathe***
