

Respected CEO

My name is Kumar A S. I got admitted into your Adyar, Chennai, Tamilnadu hospital on the 4th July 2018 for a TKR in both legs. The procedure was successfully done by respectful Doctor A B Govindaraj and his team on the 5th July around noon. I was shifted to the Post OP ward around 3.45 pm for usual observation.

I don't know how much I am indebted to your nurse at the Post OP (I don't know her name but she was young and understood later that she commutes from Ennore). The reason I am writing this mail from the comforts of room 1608 in B Block, is to express my gratitude to her, as she must have used her presence of mind by giving me a shot during an event around 4.45 pm there same day when my pulse started falling rapidly. I don't know the protocol and medications. But, as a lay man, I believe her spontaneous action made me revive from that event (which I understood thro one of my relative who is a MD Geriatrician that if a slip in action would have had me in bad shape!!). I wanted to Thank her as a saviour for me.

Needless to say that I am being taken care well during PRE, On the Surgical Table under the Knife, and Post OP, till now.

I will never forget these as long as I am alive.

Thanks to one and all in your Hospital at Adyar, Chennai, with whom so ever I have gone Thro so far.

A S Kumar
